

Samsung Hospitality Displays

HJ690U Series (EU_CIS)

Highlights

- Elevate featured content to UHD resolution through dedicated upscaling technology
- Improve picture clarity and detail with HDR10+ refinement
- Quickly create and share personalized and promotional messaging
- Allow guests to manage in-room settings within an intuitive home menu
- Gauge and address maintenance needs in anticipation of guest requests
- Build and launch compatible web applications within the powerful TIZEN operating system

UHD-Quality Content Delivery

Samsung's hospitality displays offer hotel guests the vivid picture quality of home entertainment systems on their in-room screens. Through UHD upscaling technology, these refined displays showcase all content at UHD resolution (3,840 x 2,160), and with four times the pixels of the FHD standard.

Powerful Performance, Enhanced Security

Backed by the powerful TIZEN operating system, Samsung hospitality displays reinforce secure content delivery across the application, platform and system layers. This rigid security also enables TIZEN's H.Browser technology to render 2D and 3D content and achieve faster upload and response times.

A Tailored Home Menu

Each Samsung hospitality display includes an intuitive, customizable home menu that streamlines content exchange between hotels and guests. Content managers can easily incorporate images, logos and feature icons specific to guest needs, and which reinforce special offers and hotel branding

End-To-End Personalized Service

Hotels additionally can use LYNK REACH 4.0 to deliver customized guest messaging. Upon arrival, guests can receive a personalized greeting along with information about promotions or on-site amenities relevant to their stay. LYNK REACH 4.0 also provides express check-out for added convenience.

Refined Picture Quality

Beyond consistent UHD quality, Samsung's displays bring the power of High Dynamic Range (HDR10+) picture refinement to any hotel room. Using dynamic metadata that fine-tunes each frame within a given program, HDR10+ technology delivers an optimal, detail-rich and memorable viewing experience.

Simple, Compatible Web App Development

Beyond its advanced graphics capabilities, Samsung's H.Browser empowers smooth application development. All apps can be stored within the TIZEN OS, and are supported by Web Simulator and Remote Web Inspector tools that further refine app performance and security.

Centralized, Real-Time Management

Compatible with existing LAN, Wi-Fi and coaxial infrastructures, Samsung's LYNK REACH 4.0 content platform centralizes and streamlines overall hotel maintenance. Hotel managers now can remedy issues across single displays or display groups before they escalate.

Convenient and Thorough Room Management

LYNK HMS delivers pleasant and memorable guest experience in a more cost-efficient manner. Hotel operators can streamline content delivery property-wide while also managing heat and air activity based on room occupancy.
